
Valin Hengsteel develops 13 Cr stainless steel pipes

Sunday, 23 Aug, 2009

It is reported that Hengyang Valin Steel Tube Co Limited has achieved new breakthroughs in production.

Its No. 219 mill rolled out 13Cr stainless steel pipes with the spec of 101.6×15.5 mm, filling the blanks of high grade stainless steel pipe production in the steel mill.

13Cr 101.6×15.5 mm stainless steel pipes, high technology content and high value added products, which is hard to roll out. The steel mill has overcome the production difficulties by mastering its controlling points and craft requirements, which laid a solid foundation for the batch production in future.
