## **RUSAL to cut Guinea alumina output for 1 month**

*Saturday, 27 Jun, 2009*

Russia's UC RUSAL plans to return to normal production levels at its Guinea alumina plant in August after reducing output by more than 50% from July 1st 2009.

A RUSAL executive in the west African country told Reuters that the plant will reduce alumina output to 20,000 tonnes from the current 52,000 tonne level from July 1st 2009.
