
Exhibition for heavy and construction equipment in Oman

Monday, 29 Jun, 2009

Oman International Trading and Exhibitions will organize on August 4th at Oman International Exhibitions Centre the first version of heavy and construction equipment, which will last for 3 days. The exhibition is an ideal platform for the construction and heavy equipment, as well as, other machines. Leading international companies taking part at the exhibition will present valuable ideas and solutions.

The exhibition will attract policy makers at the industrial sector, construction and trading companies, distributors, equipment agents, suppliers, consultants, lease agencies, governmental agents and investors from Gulf region and foreign countries.

The exhibition will display the latest tools, equipment, commercial vehicle, loading and transportation equipment, spare parts, accessories, drilling machines, cranes, construction technologies, road construction equipment, mineral production equipment, industrial and mechanical equipment, in addition to, doors, windows and furniture.

The organization of the exhibition coincides with the excess demand on equipment and tools used in construction sector due to the current construction boom and the major projects implemented by the government across the Sultanate.
