
NLMK quality management system complies with world standards

Tuesday, 30 Jun, 2009

Novolipetsk Steel has successfully passed the second audit of its Quality Management System for compliance with the requirements of the international standard ISO/TU 16949:2002 “Quality Management Systems: special requirements for the application of ISO 9001:2002 in the automotive industry and enterprises producing relevant spare parts”.

Over the course of the audit, effective processes and working documentation confirming quality control at all production stages were checked. Auditors from TUV Rheinland Cert GmbH assessed the technical and organizational levels of the company as positive and confirmed the compliance of NLMK’s Quality Management System with the international requirements for automotive goods production.
