
Macroeconomic indicators - Ukrainian inflation seen at 12.4pct in 2010

Tuesday, 30 Jun, 2009

Ukraine's economy ministry admits that inflation in Ukraine will reach 12.4% in 2010.

Draft economic policy guidelines for 2010 and 2011-2013 document "The government's first priority is to achieve macroeconomic stability... The expected results are to bring the consumer price index in 2010 to 12.4%, in 2013 to 5.2 to 5.5% (December over December)."

According to the document, among the authorities' priorities there should be measures aimed at backing up the stability of the national currency against the world's leading currencies.
