
Shougang Group to set up a steel logistics base in Foshan

Friday, 03 Jul, 2009

Yieh reported that the service center will have a capacity of 450,000 tonnes by its three deep-processing production lines. The warehousing will reach 2 million tonnes a year.

As per report, in order to expand its business in Southern China market, Shougang constructs three lines in its coil center for flowing its raw material of its own production including HRC and CRC.
