

## Monday Market Monitor - Metals (WEEK 40) - Chips down

Monday, 05 Oct, 2009

Industrial metals extended their decline in London after the US economy eliminated more jobs than expected in September.

Weaker than expected September manufacturing data from the United States, the world's largest economy, triggered the sell off on Thursday

US auto sales, which tumbled by 23% in September as showrooms emptied after the government funded boom from the cash for clunkers program, further undermined sentiment.
