
Ural Steel verified high level of work safety

Friday, 30 Oct, 2009

It is reported that authorized commission has verified high level of work and industrial safety at Ural Steel. Inspection was held by the independent scientific and technical center Prombezopasnost-Orenburg.

As per report, during inspection the commission analyzed Ural Steel work safety system and examined it for compliance with standard acts.

Special attention was paid to workplace arrangement working cloth provision, special compensations and benefits for workers.

Commission concluded that the Ural Steel work safety system meets all official standards. Company Work Security Certificate was prolonged for three years.
