
Rays of recovery - Saudi sees rise in foundation and piling work

Thursday, 05 Nov, 2009

Emirates Business 24|7 reported that piling and foundation contractors and consultants in Saudi Arabia are seeing an increase in work as infrastructure investment is driving growth in the construction sector.

According to IQPC, which is organizing Piling and Deep Foundations Saudi Arabia from November 7 until 10 2009 as part of the Piling and Deep Foundations series, the kingdom has retained significant growth rates due to huge oil reserves and a sound financial system.

The Saudi Government's ambitious investment programs highlighted by the development of economic cities across the kingdom continue to attract private investment and a multitude of contractors.
