## Taiwan CRC export market sees improvement

*Wednesday, 11 Nov, 2009*

It is reported that Taiwan's suppliers have cut their CRC export price as local HRC materials have declined.

Some said that the CRC price to Vietnam has dropped to about USD 650 per tonne, which is closed to China's offer.

Market player said that although China's price remained lower than Taiwan's, buyers preferred to purchase from Taiwanese suppliers which not only have better quality but also can offer sheet with wider range of sizes than China's supplier.
