
Jiuquan steel to see 15,000 tonnes cut on wire rod line repair

Sunday, 27 Sep, 2009

China Mining reported that Jiuquan Iron & Steel will repair a wire rod production line starting September 28th 2009 which will last for 9 days. The repair is estimated to decrease its output by 15,000 tonnes.

Further, it is said that a medium plate production line will be examined and repaired for 3 days sometime in mid October.
