## **Skyline Steel opens spiral pipe mill in Iuka**

*Thursday, 24 Aug, 2006*

Skyline Steel Pipe Group has officially opened its \$17 million state of the art 40,000 tons per year spiral weld pipe manufacturing facility in Iuka.

The plant produces spiral weld pipe which is used for heavy construction foundations, including bridges, wharves and skyscrapers. Steel is bent, shaped and welded to specifications. The pipes, which can be up to 12 feet in diameter, are shipped across the country, Canada and Mexico.

Mr Tom Madison VP of Skyline's Pipe Group said "We have three lines in the building, including the largest spiral weld in the US and the largest in the world right now."

Arcelor owned Skyline Steel LLC of Parsippany NJ is the largest supplier of steel foundation products in North America, with 6 manufacturing and fabrication plants.
