
TST Pipes to increase export 25pct of its production

Sunday, 15 Nov, 2009

India's leading manufacture & exporter of ERW Black & Hot Dipped Galvanized Steel pipes & tubes TST Pipes Limited s planning to open new gates, for their markets into European & USA sectors, to capture 25% of its production capacity.

Currently, exporting 15% of its production till date, company is planning to give more stress on the exports, to enhance its brand value, in the international market. This would also help, in utilizing the production capacity, to a higher extent.

To capture the European & USA sector, company would like to give more stress on pre galvanized pipes.

In addition to the above, the company is also planning to manufacture new series of pipes

1. Light Weight Shouldered end steel pipes,
2. Pre Galvanized Coupling Systems

This would be used in irrigation, water supply, conduits, fire fighting and sprinkler irrigation etc.

TST Pipes is a diversified business house & is planning to enter into counter and third country trade for various light engineering products.
