
Readymade information to help you expand your reach in India

Tuesday, 17 Nov, 2009

Last 8 months have spelt doom for almost all walks of life, more so for booming steel and consuming sectors in India. Now every company is taking various measures to remain afloat at these trying times and emerge as winner later

In addition to realigning business processes and improving efficiency to reduce costs, one can try to expand business by reaching out to more clients.

But Indian industry is by and far highly defragmented and thus it is quite difficult and time consuming to reach smaller players. Therefore SteelGuru has made an effort over last 12 months to collect the contact details of various segments and has published several directories.

The directories contain only the following details

1. Name
2. Address
3. Phone No
4. Fax No (Wherever available)
5. E Mail (Wherever available)
6. URL (Wherever available)

They are delivered in PDF format through e mail

The list of such directories is as under
