
Baosteel GO Silicon Steel lines fully realized monthly 4 reach

Saturday, 28 Nov, 2009

In October Baosteel autonomous and integrated GO silicon steel lines fully reached production capacity, quality, efficiency and energy consumption standards a comprehensive breakthrough with each individual line consecutively realizing monthly 4 reach since commissioning last year, signifying new progress in manufacture, technology and management.

Baosteel high grade GO silicon steel has taken up over 50% in total, compared to initial 15% and provided stable supply to over 300 domestic and overseas users.
