
AK Steel adds surcharge to electrical steel invoices

Friday, 04 Dec, 2009

AK Steel has advised its customers that a USD 155 per tonne surcharge will be added to invoices for electrical steel products shipped in January 2010.

AK Steel's surcharges are based on reported prices for raw materials and energy used to manufacture the products, with the November 2009 purchase cost used to determine the January 2010 surcharges.
