
Dneprospetsstal increased rolled steel production by 41pct

Monday, 15 Mar, 2010

It is reported that in January to February 2010 Dneprospetsstal increased rolled steel production in comparison to the related period of the previous year by 40.7% to 38000 tonnes. In February it produced 19000 tonnes of finished steel.

Crude steel production in the same period is also increased at the company down by 47.2% to 53,000 tonnes.

We'd like to remind that in 2009 Dneprospetsstal reduced its production in comparison with 2008: crude steel down by 46.2% to 260,000 tonnes, rolled steel by 43.1% to 161,000 tonnes.

Dneprospetsstal is the only producer of alloyed steel long products and forgings of stainless, instrumental, cutting, bearing steel and of heat resistant nickel-based alloys.
