
Chador Malu iron ore output declines by 6pct

Thursday, 18 Mar, 2010

According to the Iranian Mines and Mining Industries Development and Renovation Organization, Iranian miner Chador Malu produced 8,747,000 tonne of iron ore of the current Iranian year down about 6% compared to 9,267,000 tonne in the same period of the last Iranian year.

IMIDRO said that Chador Malu produced about 7.7 million tonne of iron ore concentrate in the given period while producing about 1.07 million tonne of fines and lumps in the same period.
