
Jiugang commissions CR SS line

Wednesday, 28 Nov, 2007

It is reported that the first production line of cold rolled stainless steel in west of china had been put into production at Jiugang's stainless plant on November 26th 2007.

The project has an annual output of 530,000 tonnes of stainless steel plate production capacity and can produce high grade 300 series, 400 series of cold rolled stainless steel strip.

Jiugang stainless steel plant's CR project is a core group of Jiugang group stainless steel, with the total investment is CNY 2.4 billion. It indicates that Jiugang become the third enterprise has the production system from steel making to complete stainless steel rolling after Taigang and Baogang.
