## **Taisteel to cut production of stainless steel in December**

*Friday, 30 Nov, 2007*

It is reported that Taigang plans to cut the stainless steel's production output in December down by 30% compared with the production in November 2007 .

In order to stabilize the market, the upstream steel plants decreased the supply all along in Q4. Taigang began to cut the quantum in October 2007.
