
Tenova revamps pusher furnace of Acroni doo Jesenice in Slovenia

Wednesday, 28 May, 2008

Tenova LOI Italimpianti announced that it has successfully received the FAC Certificate from Acroni doo Jesenice, Slovenia for the revamping of the 90 tonne per hour pusher furnace.

The major revamping and modernization of the furnace was the replacement of the top soaking zone refractory hearth arrangement with a top and bottom soaking zone as skids cooling system. The supply included also the new discharging machine replacing the existing slope skids.

Aim of the refurbishment was to increase the furnace throughput and achieve better furnace's performances in term of product quality and decrease of the energy consumption.
