
Baosteel to construct PPGI houses in Dujiangyan

Friday, 13 Jun, 2008

According to the arrangement by local government of Dujiangyan, the project of constructing 10,000 square meters of buildings of color coated steel sheet in Dujiangyan for Bureau 10 by SinoHydro Corporation began recently and the project is donated by Baosteel.

To help the company recover from the disaster, Baosteel decided to construct 10,000 square meters of buildings of color coated steel sheet for Bureau 10. When the project began, Baosteel has been working on the design according the general plan of Dujiangyan. Now the project is moving on smoothly.

As the largest hydropower Construction Company in China, SinoHydro Corporation ranks the 89th among the top 500 companies in China, and the 51st among the world's major contactors of large projects. The earthquake in Wenchuan severely damaged the subsidiaries of SinoHydro Corporation in Sichuan Province, in particular the Bureau 10.
