
POSCO to start Mexican HDG line in 2009

Tuesday, 15 Jul, 2008

It is reported South Korean POSCO's new hot dipped galvanizing plant in Mexico will put into production by June 2009.

This 400,000 tonnes plant is located at industrial complex at Altamira in Mexico, the mill now is still under construction.

POSCO now operates three processing centers in three major Mexican auto industry regions.

POSCO said that it plans to supply its own CR required to make the galvanized and galvanized steel.
