
Prism Cement awards contract to Danish Cement

Saturday, 27 Sep, 2008

It is reported that Prism Cement part of Rajan Raheja Group has placed order worth INR 203.5 crore with Danish cement and minerals technology supplier FLSmidth & Co for supply of machinery and equipment for a new cement production line at Satna plant in Madhya Pradesh.

As per report, FLSmidth's Indian project division in Chennai has conducted the negotiations for the new production line and will be responsible for implementing the project.

The company will supply the machinery and auxiliary equipment comprising 2 ATOX raw mills, an ATOX coal mill and a kiln system with a two string 6 stage ILC pre heater, a SF Cross Bar cooler and 2 UMS ball mills for cement grinding.
