
Xilin Steel hits new record on steel bar production

Friday, 31 Oct, 2008

It is reported that Xilin Iron & Steel Group's No 2 rolling mill has kept daily steel bar output of over 2,000 tonnes per day since September after reconstruction with 2,314 tonnes per day the most.

The plant has yielded steel bar of 37,757 tonnes from September recently creating considerable profits for the mill.

So far, the mill has rolled out 0.355 million tonnes of steel bar in different gauges, and expects to finish the annual goal of 0.5 million tonnes.
