
RAK Steel secures ISO 9001:2000 certification

Friday, 21 Nov, 2008

It is reported that RAK Steel has received the prestigious ISO 9001:2000 certification in recognition of its dedication to quality standards in the manufacturing of rebars.

The ISO certification was presented by Ms Carina Ekblom VP & executive director of Intertek Systems Certification which is accredited globally for providing certification services to the various management systems standards.

As per report, the certification is awarded in recognition of RAK Steel's compliance with ISO 9001 2000 quality system requirements and continual improvement of the effectiveness of its QMS processes in manufacturing rebars to applicable international standards as well as customer requirements.

Mr Ajay Aggarwal CEO of RAK Steel said that "It was a very important milestone achievement to receive this certification within 10 months of commencement of business by RAK Steel."

He added that "This was possible because of the hard work and dedication of each and every employee of the company in following the laid down system procedures and the value added audit service received from Intertek systems certification, Dubai." he stated after receiving the certification.
