## **US DoC to review AD duty on Taiwanese carbon steel pipes**

*Wednesday, 21 Jan, 2009*

It is reported that US Department of Commerce has initiated an administrative review of the antidumping duty order on certain circular welded carbon steel pipes and tubes from Taiwan in response to a request from Allied Tube & Conduit Corporation.

This review covers Yieh Hsing Enterprise Co Limited for the period May 1st 2007 through April 30th 2008.

The DoC intends to rescind this review after determining that Yieh Hsing did not have entries during the period of review upon which to assess antidumping duties.
