## **Novokuznetsk completes gas chimney**

*Friday, 14 Apr, 2006*

Novokuznetsk Metal Integrated Works, a member of Evraz Group, has completed the assembling of a smoke exhauster, the system of valves and a gas escape path on the second unit of steel complex treatment currently under construction.

During a week after the completion of the assembly of a 170 meter gas escape, the unit will be connected to the gas purification unit constructed last year. In this way, the discharges of the unit, which will be put into operation in May 2006, will be caught by modern gas purification equipment from the very beginning.
