
JCB expands capacity at Ballabgarh plant

Sunday, 19 Apr, 2009

JCB India, the earthmoving and construction equipment manufacturing company has expanded production capacity of its Ballabgarh plant in Haryana from 50 to 100 backholes a day. The expansion has been carried on at an outlay of INR 300 crore.

Backhoe is an excavator with a bucket on the end of an arm, generally used in housing and highway projects.

JCB has also invested INR 550 crore in the last three years at two facilities in Pune, Maharashtra that make products such as excavators soil compactors and loaders.
