
Sinarsky Tube gets delegation from Uzbekistan

Monday, 18 May, 2009

It is reported that Sinarsky Tube and Taganrog Metallurgical Works was visited by the delegation Sanoat Loyiha leading oil and gas companies of Uzbekistan Enterprise and Design Institute Neftgaz Sanoat Loyiha.

The purpose of the visit of Uzbek specialists was to bring familiarity with the production process and quality control of pump and compressor casing with threaded connections.

Guests visited the office continuous casting machines, and tube-rolling mill with a continuous range of Premium Quality Finishing.

The representatives of Uzbek enterprises appreciated the high level of production of pipes with special properties and discussed with representatives of the Company's prospects for further cooperation, including on the supply pipes with threaded connections.
