
Baosteel Foshan tin making line commissioned

Friday, 12 Jun, 2009

Foshan tin making Corporation invested and constructed domestically by Baosteel was put into formal production a few days ago.

Mr Xiao Zhiheng, member of the standing committee and vice-governor of Guangdong province, and Mr Xu Lejiang, board chairman of Baosteel Group Corporation attended the celebration of the putting into production. They pressed the production button together. Baosteel has acquired the annual production capacity of 2.7 billion steel seamless tin and as well achieved the layout that steel seamless tin manufacturing and service system covering East China, South China, North China and West area.

Miss Li Miaojuan the director of Guangdong province development and reforming committee and the secretary of party committee, Mr Lin Yuanhe secretary of Foshan municipal committee and Mr Dai Zhihao the deputy general manager of Baosteel Group Corporation attended the celebration of putting into production with other leaders.

Baosteel Foshan tin-making Corporation was established at the end of 2006, the total project investment of which sums up to 375 million RMB. Its annual steel seamless tin production is designed to be 700 million. Foshan tin-making Corporation equipped with international top-ranking manufacture equipments, adopts new techniques such as color printing with 8 colors, advanced collection of production information and analyzing system, online product inspection system with high-sensitivity and high-efficiency, which can guarantee the product's quality effectively, it can provide the packing assorting service for many well-known brands like Coca Cola and Pepsi etc.

Miss Li Miaojuan expressed her appreciation for Baosteel's long-time support to Guangdong economic construction ever in the celebration of putting into production. She said, steel industry is one of the most emphasized development industries that mentioned definitely in the. Baosteel tin-making was located in ShunDe district of Foshan city in Guangdong province. It's both an important step of South China regional strategic layout for the further processing industry of Baosteel steel product and a significant act of optimizing and adjusting ShunDe industrial configuration. She hopes that the government of all levels can keep providing best services and create a good developmental condition for Baosteel Foshan tin-making Corporation.

Mr Dai zhihao said Baosteel Foshan tin-making corporation is the first strategic stationing for Baosteel extending its machining product item in South China. Foshan city locates in the middle part of Pearl River delta economy district with its natural terrain advantage. Foshan tin-making Corporation putting into production indicate that the strategic plan and layout of Baosteel metal assemble and packing industry have gained phased achievement. It sets up the manufacture and sale network of steel seamless tin together with Shanghai Baoyi tin-making, Baosteel Hebei tin-making and Baosteel Chengdu tin-making corporations, to realize there is no blind area of Baosteel tin-making service. Baosteel will speed up the pace of industrial extending to provide good service for South China market under the rapid development of Pearl River delta region further.
